

## REPORT ON HOW COVID-19 RESOURCES ARE BEING USED

*Figure 1 David Gordon Memorial Hospital*

When the Covid-19 pandemic was first announced in China, like the rest of the world we thought it would last for a few days and then disappear only to be history. To our surprise days grew into weeks and weeks into months until now the whole world has been engulfed in fear because of the enemy which we can not see with our eyes. The enemy which is moving at the speed of light from place to place and from person to person.

DGMH as a hospital and participant (player) in the health sector we were also caught by surprise with the pandemic which caught us unaware and unprepared as it is entirely a new disease on the face of the planet. In the process to prepare for the enemy we decided to reach out to you our dear brethren for financial help so we can procure different materials required in preparing and fighting the pandemic. These resources included but not limited to the following.

<b>No.</b>	<b>Product Name</b>
1	N 95 mask
2	Face Masks
3	Sun goggles
4	Aprons (disposable)
5	Aprons (reusable)
6	WaterBuckets( with tap)
7	Water buckets( without tap)
8	Soap (lifebouy) tablet

9	Alcohol Handrubs 100mls
10	heavy duty gloves
11	Examination medium gloves
12	surf (15kg packs)
13	Toilet paper - bale
14	head gears
15	ream
16	chlorine

The above shows the list of itwems and resources needed preventing Covid-19 during working time.

When we submitted our request for assistance to you, you did not hesitate but to help us with funds amounting to **£7000** which is equivalent to **MK6,510,000.00**. out of this the hospital has spent **MK4,501,500.00** on preventive materials. This is so because our budget also included the treatment part of which some of the resources will be bought at a later stage.

Figure 2 shows procured buckets and heavy duty gloves for use

The procured materials were not only used at and by employee at DGMH but also the in the Health Centres and the staff in the health centres.

Figure 3 shows a set up of a handwashing point as a means to prevent covid-19 and client being directed to wash hands

Some of the items were sent to health centres for use in the health centres by health centre staff.

Figure 4 Shows a set up of a hand washing site at Msumbe Health Centre

Figure 5 shows DGMH employees in putting on personal protective equipment.

Figure 6 Employees at Health Centre receiving consignment of preventive materials.

The Procurement of personal protective equipment has really helped DGMH and its health centre as the employees are assured that they are protected in the course of discharging their duties.

**SHALOM!!!!!!!!!!!!**
